

Your guide to superior home protection.

TERMINIX[®]

No one knows termites and pests like Terminix.[®]

Founded in 1927, we were the first company in the U.S. to obtain a termite control patent. Today, we safeguard millions of homes from the threat of termites and pests throughout the U.S. and internationally.

As an industry leader, Terminix has delivered termite and pest solutions for more than 95 years.

Thousands of expertly trained technicians deliver effective solutions customized for termite and pest activity in your area.

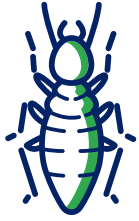

Termites and pests? Check. But we also offer a variety of other innovative solutions to help keep your home protected top to bottom, inside and out.

We're here to help protect what matters most.

Not sure what your home needs? Use this checklist to ensure you have superior protection top to bottom, inside and out.

- Termite control**
Termites are always a threat. Often, termite damage is unseen, behind walls and ceilings and can cost thousands of dollars.
- Pest control**
There's no off-season when it comes to pest protection. Every season of the year brings unique challenges to protect your home from a variety of pest problems.
- Mosquito control**
Mosquito bites cause more than itchy welts. They may carry pathogens that can spread harmful diseases, such as West Nile Virus, and lay up to 3,000 eggs in a few weeks.
- Tick control**
Did you know that ticks can survive in many climates, from summer heat to winter chill? They can wait for days and weeks to find a host, and when they do, they may carry pathogens that can spread harmful diseases.
- Bed bug control**
Bed bugs hide in cracks, folds and tucks around rest areas, and since they live up to 12 months, bed bug removal can be difficult without the help of a professional.
- Rodent & wildlife control**
Rodents and other wildlife want to make themselves at home — in your home. They are always looking for food and shelter, and once inside, they can cause property damage by chewing through wires, damaging drywall and insulation, and more.
- Gutter protection**
When your gutters are clogged with leaves and debris, the standing water can lead to damage to your home and attract a variety of pests, such as mosquitoes, cockroaches and ants.
- Attic insulation**
Terminix will install an efficient cellulose insulation on top of your existing insulation or between attic joists. Terminix can also replace your existing insulation.
- Moisture control**
Moisture in your home can create all kinds of problems, from structural damage and poor air quality to attracting destructive pests.

Termites are always a threat.

But don't wait for a termite infestation. Prevent one with Terminix.

Here's how it works:

- 1 Technicians strategically install a series of bait stations in the soil to create a zone of protection around your home.
- 2 Bait stations start working immediately to intercept termites with a substance they prefer over the wood in your home.
- 3 The termites feed on the bait and take it back to their colony, which eliminates the remaining population.
- 4 Annual inspections by your expert technician monitor the stations for any signs of termite activity.

The Nix Termite Guarantee means you can relax knowing we'll nix your termite problem, and keep it nixed. And if termites come back or if signs of new activity appear, so will we — at no additional cost to you.¹

The Nix & Fix Termite Guarantee means we'll nix your termite problem for as long as you keep your plan. Plus we'll come back and fix any new termite damage up to \$250,000.²

¹ Treatment and terms defined in your Plan. Applies only to subterranean termites. Limitations apply. See Plan for details.

² THE NIX & FIX TERMITE GUARANTEE IS AVAILABLE FOR QUALIFYING HOMES ONLY. Applies only to subterranean termites. Not available in all areas. Covered Damages are limited to \$250,000 in the aggregate throughout the life of the Plan, including any additional renewal term. Additional limitations apply. See Plan for details.

Pests don't stand a chance.

Our expert technicians get ahead of pest issues — protecting you every day, every season, all year long.

We provide ongoing protection against:

Cockroaches

"House" Ants

Mice & Rats

Wasps

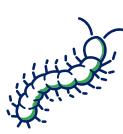

Spiders
(Non-Dangerous)

Scorpions

Millipedes

Centipedes

Clothes Moths

House Crickets

Silverfish

Earwigs

Our Pest Control Plan³ includes:

Ongoing protection

from 13 common pests that try to get into your home.

Seasonal treatments

to establish and reinforce barriers so pests stay out even as pest pressures change.

Expert service

from our trained technicians who know when and where pests are likely to invade.

The Nix Pest Guarantee™ means you can relax knowing we'll nix your pest problem, and keep it nixed. And if pests come back between treatments, so will we — at no additional cost to you.⁴

³ Standard Covered Pests: cockroaches, mice, rats, silverfish, "house" ants (excluding carpenter ants, fire ants, pharaoh ants and tawny crazy ants), clothes moths, spiders (excluding black widow and brown recluse spiders), scorpions, centipedes, millipedes, earwigs, house crickets and paper wasps. Other pests not specified as Standard Covered Pests may be covered for an additional charge or under other plans.

⁴ Treatments and Covered Pests defined in your Plan. Limitations apply. See Plan for details.

We take mosquitoes down fast.

Our Quick Guard® Mosquito Service begins working immediately to reduce mosquito populations and works for weeks to provide long-lasting protection.

Here's how it works:

1

Inspect

We conduct a thorough inspection and customize a treatment plan.

2

Eliminate

Our treatment begins working immediately to reduce the mosquito population in your yard.

3

Protect

Treatment creates a zone of protection that lasts for weeks.

4

Maintain

Recurring applications keep mosquitoes down and outdoor enjoyment up.

The Nix Pest Guarantee™ means you can relax knowing we'll nix your mosquito problem, and keep it nixed. And if mosquitoes come back between treatments, so will we — at no additional cost to you.⁵

⁵ Treatment terms defined in your Plan. Limitations apply. See Plan for details. NOT AVAILABLE IN NY, VT, NH AND PORTIONS OF CT.

We protect against ticks, too.

Our Tick Defend System™ uses a customized approach for your lawn that attacks ticks from every angle to keep your yard less tick-friendly.

Here's how it works:

1

Inspect

An initial inspection identifies potential tick activity sites.

2

Prevent

We recommend ways to make your outdoor space less tick-friendly.

3

Treat

Treatment begins working immediately to reduce your yard's tick population.

4

Maintain

Monthly tick service keeps populations down for more peace of mind.

The Nix Pest Guarantee™ means you can relax knowing we'll nix your tick problem, and keep it nixed. And if ticks come back between treatments, so will we — at no additional cost to you.⁶

⁶ Treatment terms defined in your Plan. Limitations apply. See Plan for details.

Rest assured, bed bugs have met their match.

Say goodbye to bed bugs while eliminating the hassle of preparation prior to treatment. Our unique, no-prep process uses a holistic and proven approach to control and eliminate infestations.

Here's what you can expect:

+ No prep required

Some companies require extensive preparations. Our approach avoids disrupting you and your home. Bed bugs think they're safe. They're not.

+ Not just pesticides

We use a multi-faceted approach to help solve your bed bug problem.

+ Encasements

No need to discard your bed. Our mattress and box spring encasements preserve your bed and continue to protect you, long after bed bugs are gone.

+ Detection + elimination

Our interceptor devices detect bed bug activity to help us eliminate them quickly.

+ Continuous follow-up

We'll keep servicing your home for ongoing peace of mind.⁷

The Nix Pest Guarantee™ means you can relax knowing we'll nix your bed bug problem, and keep it nixed. And if bed bugs come back within 6 months, so will we — at no additional cost to you.⁷

⁷ If you see evidence of bed bugs in your home within 6 months of your initial treatment date, Terminix will perform an inspection and provide any necessary treatment at no extra cost. 6-month guarantee only available for single-family dwelling units. Limitations apply. See Plan for details.

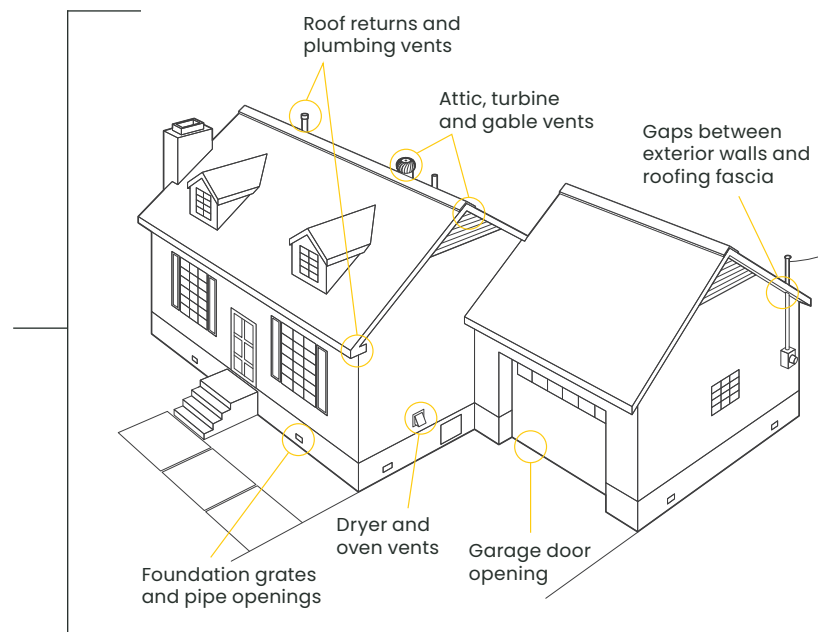

Don't let rodents and wildlife make themselves at home.

You love your home – unfortunately, so do rodents and wildlife. Not only can these invaders destroy your property, they may carry pathogens that can spread harmful diseases. **Our Rodent & Wildlife Exclusion Service can keep your home protected from these uninvited visitors.**

How Terminix rodent & wildlife exclusion works:

Your experienced Terminix team will:

- 01** Conduct a **free** inspection
- 02** Customize a plan to meet your needs
- 03** Remove any unwanted animals already inside your home
- 04** Secure the exterior by blocking potential entry points
- 05** Inspect installed components annually to make sure wildlife and rodents are out for good

The Nix Pest Guarantee™ means you can relax knowing we'll nix your rodent and wildlife problem, and keep it nixed. For as long as you keep your plan, we'll do the following at no additional cost to you:⁸

- Take care of the new rodent or wildlife invasion
- Repair damaged exclusion components or materials we installed
- Seal any new entry points that were created

⁸ Coverage includes rats, mice, bats, tree squirrels, flying squirrels, raccoons, opossums, skunks, groundhogs, armadillos, pigeons, starlings and sparrows. Limitations apply. See Plan for details.

Keep the mess – and pests – out of your gutters.

Clogged gutters can become a breeding ground for mosquitoes, ants and cockroaches while causing damage to your home. **Our gutter protection service not only keeps pests out, it also keeps your gutters clean and well maintained.**

Our gutter protection service will help protect your gutters from:

Leaves and debris that cause overflow damage to the fascia and eaves.

Mosquitoes that breed in the standing water clogged by debris.

Ants that are attracted to the moisture found in unprotected gutters.

Cockroaches that are drawn to the moisture found in debris-filled gutters.

How Terminix gutter protection works:

Your Terminix gutter team will:

- 01** Conduct a **free** inspection of your home's existing gutter system
- 02** Customize a gutter protection solution
- 03** Professionally install a gutter protection system that protects against clogs and pests

Help protect your home with attic insulation.

Our attic insulation service is all about protection. We will install an efficient cellulose insulation on top of your existing insulation or between attic joists. We can also replace your existing insulation.

How Terminix attic insulation works:

Your experienced Terminix team will:

- 01** Conduct a **free** inspection to assess your needs
- 02** Prep your home to help ensure an efficient and clean process
- 03** Install insulation to the recommended R-value either on top of your existing insulation or directly between the joists

Before

After

For more information, visit our [attic insulation service](#) page.

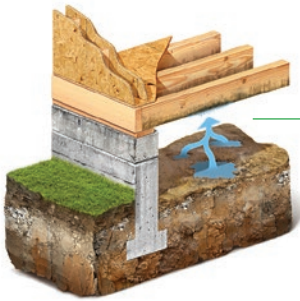

When your crawl space is dry, your home is better protected.

Moisture in your home can create all kinds of problems, from structural damage and poor air quality to attracting pests.

Our moisture control solution will help reduce excessive humidity and minimize moisture in your crawl space. It not only protects against water damage, fungi and mildew, it can also correct moist conditions that may lead to structural problems.

How moisture damages your crawl space:

Moisture evaporates from the soil in your crawl space and forms condensation on the wood under your home.

How Terminix crawl space encapsulation works:

Protect

- 01** We install a high density, reinforced liner that creates a barrier against moisture and humidity
- 02** Then, we install an ENERGY STAR® qualified dehumidifier under your home, which will remove up to several gallons of water per day and is backed by a one-year manufacturer warranty
- 03** If needed, we'll install interior foundation drains to prevent standing water and facilitate drainage

Detect

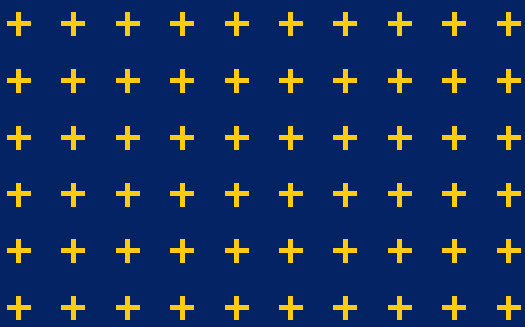

- 04** We place a remote monitoring device in your home so you can monitor your crawl space's humidity levels

Inspect

- 05** We'll inspect your crawl space annually and complete regular maintenance to make sure you're getting the best protection possible

Our high-density, reinforced liner covers the entire ground area, walls and support piers in your crawl space to limit moisture and humidity.
